

Twin Retractable Block Connector

- Allow to attach two FA 20 502 02 or two FA 20 503 02 Block directly with the intersection of the dorsal straps of the user's harness. This enables the usage of the block like a forked shock absorbing lanyard.
- No additional connector is required.
- Reduces the length of swing during the fall, thereby preventing the impact of retractable block on the user.

Model: FA 20 502 02 B
